DETAILED ACTION

Acknowledgement

1. Acknowledgement is made of applicant's amendment made on 06/22/2009. Applicant's submission filed has been entered and made of record.

Status of the Claims

2. Claims 1-29 are pending.

Response to Applicant's Arguments

3. **Claims 1-29 are allowed.**

Per applicant's arguments, the current claimed invention is patentable over *Hamamichi*. In particular, in Claim 1, *Hamamichi* does not disclose "a humidity detection step for detecting humidity by the humidity detection unit when a determination is made in the determination step that a correction value with respect to the initial value exceeds the predetermined range" and "a correction value determination step for determining a correction value of the toner density reference value, based on the humidity detected in the humidity detection step". Similarly, in Claim 25, *Hamamichi* does not disclose "detecting a humidity change by monitoring an output of the humidity detecting unit when said unit determines that a correction value with respect to the initial value exceeds the predetermined range" and "determining a correction value of the toner density reference value based on the humidity change detected by the detecting unit".

Further, *Saiko et al. (US 5826136 A)* discloses an image processing apparatus and method that constantly and gradually modify a charger output V_g on the basis of a toner concentration value (Col 6, Rows 30-45) comprising a correction value determination step for determining a correction value of a toner density reference value based on detected humidity (Col 9, Rows 1-17, using a temperature humidity sensor 31 to provide the basis for correcting a toner concentration reference value S). However, while *Saiko* does takes into consideration humidity in correcting its “toner density reference value” or toner concentration reference value, it does not disclose “a humidity detection step for detecting humidity by the humidity detection unit when a determination is made in the determination step that a correction value with respect to the initial value exceeds the predetermined range” and “a correction value determination step for determining a correction value of the toner density reference value, based on the humidity detected in the humidity detection step” of Claim 1 nor “detecting a humidity change by monitoring an output of the humidity detecting unit when said unit determines that a correction value with respect to the initial value exceeds the predetermined range” and “determining a correction value of the toner density reference value based on the humidity change detected by the detecting unit” of Claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be labeled “comments on statement of reasons for allowance”.
